About the Economic Update

Economic Update is a monthly publication produced by the Centre for Central Banking Research of MMA presenting a quick overview of current developments in the Maldivian economy. It also includes a chart pack of global economic and financial indicators. The Economic Update will be posted on MMA's website at the end of each month. This Economic Update is based on the latest available data as at 25 February 2026.

Domestic Economic Developments

Real Economy

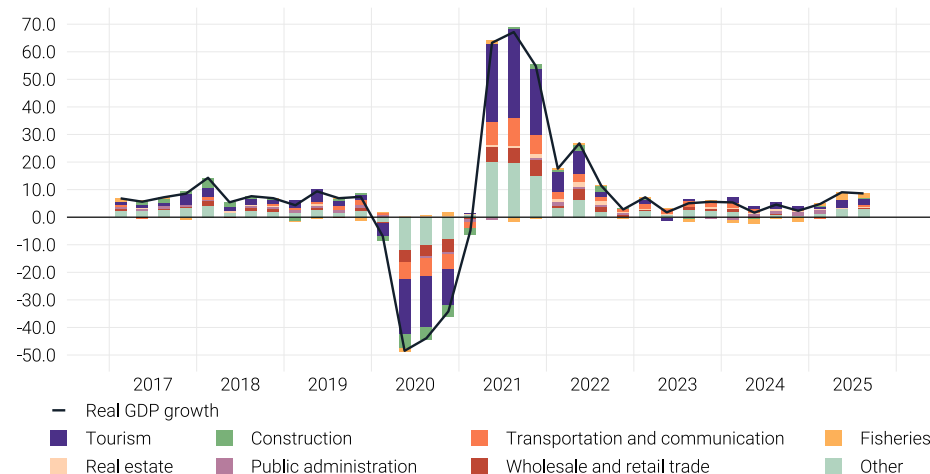

Gross Domestic Product

- According to the advance estimates of the Quarterly National Accounts (QNA) for Q3-2025 released by the Maldives Bureau of Statistics (MBS), real GDP grew by 8.6% in Q3-2025, compared to the corresponding quarter of 2024. This is a slight deceleration from the growth of 9.0% recorded in Q2-2025.
 - The annual growth in real GDP during Q3-2025 was mainly driven by the expansion in the tourism and fisheries sector. Growths were also observed in sectors such as financial services, transportation and communication, human health and social work as well as manufacturing. Additionally, arts, entertainment, recreation and other services, real estate, public administration, electricity, water and waste management, construction as well as wholesale and retail trade sectors also registered growth during the quarter.

Annual GDP Growth Forecast

- According to the growth forecasts for October 2025¹, real GDP is projected to grow by 5.4% in 2025. Growth forecast for 2025 have been revised downwards, compared to the forecasts produced in October 2024. As per the revised estimates of real GDP released by the Maldives Bureau of Statistics in October 2025, following a growth of 4.9% in 2023, the annual real GDP is estimated to have grown in 2024 by 3.5%—2.0 percentage points lower than the estimate of October 2024. In 2024, real GDP growth was led primarily by the expansion of the tourism sector, together with positive contributions from public administration, real estate, and transportation and communication sectors.

Tourism

- In January 2026, total tourist arrivals stood at 224,788, registering an increase of 5% when compared with the corresponding month of 2025. Meanwhile, total tourist bednights rose by 6%, solely owing to the increase in bednights of guesthouses. During the month, guesthouse bednights increased by 36%, while resort bednights remained broadly unchanged.
 - The annual increase in tourist arrivals largely reflected robust arrivals from Russia and Italy. During the month, the highest number of tourist arrivals were recorded from Russia, Italy, China, the United Kingdom, and Germany.
- The operational bed capacity of the tourism industry observed an annual increase of 5,795 beds in January 2026, while the occupancy rate dropped to 71% in January 2026, from 73% in January 2025.
- Overall, for the year 2025, total tourist arrivals rose by 10% in annual terms, while total bednights increased by 2%. During January 2026, the average stay decreased to 6.9 days, from 7.0 days in the corresponding period of 2025.

Public Finance²

- Total revenue (excluding grants) observed an increase of MVR294.2 million (or 13%) in November 2025 when compared with November 2024, owing to the increase in tax revenue. As such, tax revenue increased by MVR449.6 million, whereas non-tax revenue declined by MVR155.4 million.
- Total expenditure (excluding amortisation) declined by MVR351.1 million (or 9%) in November 2025 when compared with November 2024, primarily stemming from the decline in capital expenditure, which decreased by MVR815.0 million. Meanwhile, recurrent expenditure increased by MVR463.9 million in November 2025, when compared with November 2024.
- According to the latest available data, the stock of total government debt (excluding government guaranteed debt) amounted to MVR134.4 billion at the end of Q4-2025, a 3% increase from Q3-2025. Similarly, total government debt as a percentage of GDP rose to 115% at the end of Q4-2025, from 112% in Q3-2025.
 - During this period, the increase in government debt was primarily driven by domestic debt.

Monetary Developments

Reserve Money

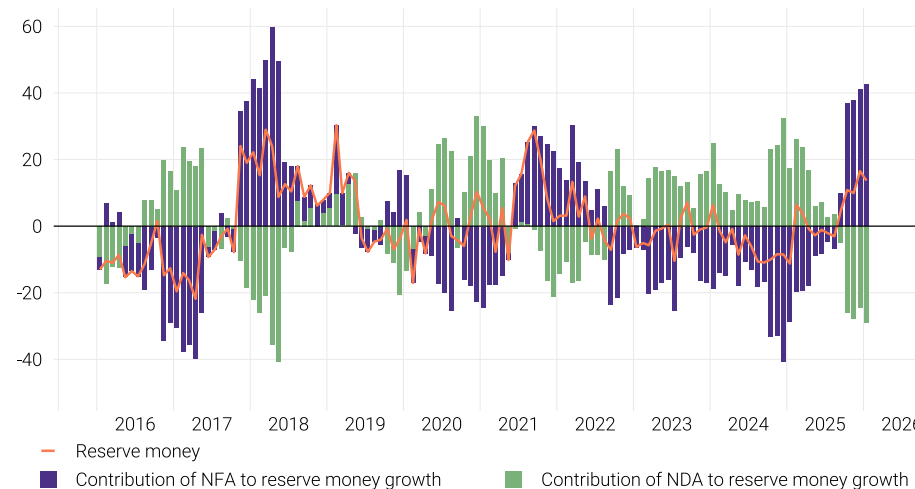

- Reserve money (M0) increased by 14% at the end of January 2026, following a 17% increase registered in December 2025. This mainly reflected the annual increase in net foreign assets, which entirely offset the decline in net domestic assets during the period.
 - Net foreign assets increased, primarily owing to the increase in foreign asset accumulation, despite the marginal increase in foreign liabilities. Meanwhile, net domestic assets declined, mainly reflecting the decline in net claims on central government.

Broad Money

- Broad money (M2) registered a growth of 20% at the end of January 2026, after recording a growth of 21% at the end of December 2025.
 - On the components side, the annual increase in broad money mainly reflected the significant increase in time deposits denominated in local and foreign currency, followed by an increase in transferable deposits denominated in local currency and savings deposits denominated in local currency. Meanwhile, currency outside depository corporations rose during the month.
 - As for the sources, the growth in broad money was primarily driven by the increase in net domestic assets, mainly owing to the increase in net claims on the central government by the commercial banks, together with the increase in credit to the private sector. Meanwhile, net foreign assets also increased, as the increase in foreign asset accumulation outpaced the increase in foreign liabilities during the period.

(annual percentage change)

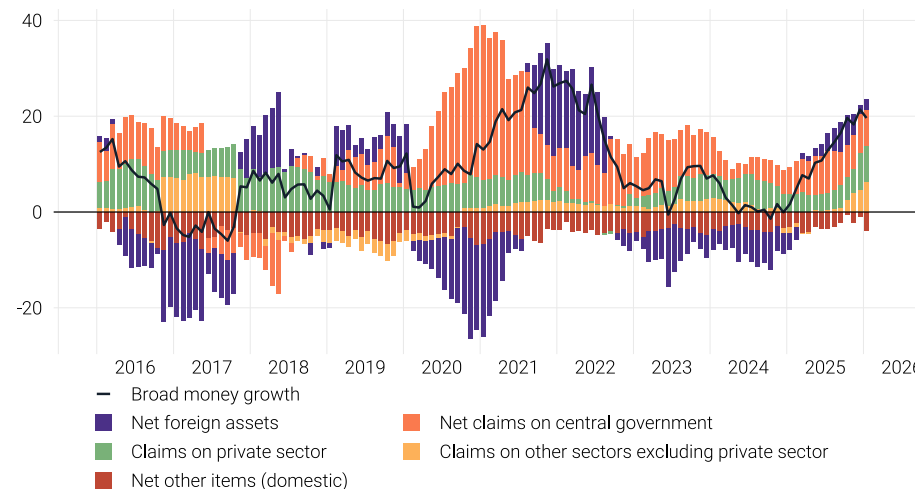

Credit to Private Sector

- The annual growth rate of credit to the private sector by the commercial banks registered 13% at the end of January 2026, remaining broadly unchanged from 13% recorded in December 2025.
 - As such, credit to major sectors (namely tourism, personal loans, construction, commerce and real estate) continued to expand in January 2026. Tourism sector registered the highest growth during the month, with an annual increase of 13% and continued to account for the largest share of bank credit with 35%.
 - The annual growth in credit for the tourism sector was driven by an increase in credit lent for working capital, new resort development, renovation of resorts and guesthouses.

External Trade

- Total exports (f.o.b) increased by 28% in December 2025, when compared with December 2024, whereas total imports (c.i.f) declined by 8% during the same period.
 - The annual increase in total exports stemmed primarily from the increase in domestic exports, largely owing to higher earnings from frozen skipjack tuna and frozen yellowfin tuna, which completely offset the decline in earnings from canned or pouched tuna. Similarly, re-exports also increased during the period, which reflected higher earnings from the other re-exports category as well as increased earnings from re-export of jet fuel.
 - The annual decline in import expenditure stemmed from decrease in imports of transport equipment and parts, construction-related items, petroleum products as well as furniture, fixtures and fittings. In contrast, imports of electrical and electronic machinery and equipment and parts as well as machinery and mechanical appliances and parts increased during the period.
- Overall, for the period January to December 2025, total exports increased by 16%, while total imports remained broadly unchanged when compared with the corresponding period of 2024.

Gross International Reserves

- Gross international reserves³ (official reserve assets) increased to US\$1.0 billion at the end of January 2026, from US\$983.0 million at the end of December 2025. Additionally, this depicted a growth of US\$318.1 million from the US\$708.1 million recorded at the end of January 2025.
 - In terms of growth rates, increases of 45% and 4% were registered when compared with January 2025 and December 2025, respectively.
