About the Economic Update

Economic Update is a monthly publication produced by the Research Division of MMA presenting a quick overview of current developments in the Maldivian economy. It also includes a chart pack of global economic and financial indicators. The Economic Update will be posted on MMA's website at the end of each month. This Economic Update is based on the latest available data as at 28 February 2022.

Domestic Economic Developments

Real Economy

Gross Domestic Product

- According to the advance estimates of the Quarterly National Accounts for Q3-2021 released by the Maldives Bureau of Statistics, real GDP made a strong rebound, registering 76.5% in Q3-2021, compared to the corresponding quarter of 2020, following a growth of 71.6% in Q2-2021. Despite the strong rebound in growth, GDP remains 5.7% below pre-pandemic levels in Q3-2019.
 - The strong rebound in the annual GDP growth during Q3-2021, was mainly driven by the significant pick-up in tourism sector, largely mirroring the base effect of the decline in the sector, despite the re-opening of international borders in Q3-2020. In addition, positive contributions were observed in other major sectors of the economy including transport and communication; wholesale and retail trade and construction sector. Similarly, when compared with the preceding quarter, real GDP observed a marked increase, following the easing of containment measures implemented during May-June 2021, including lifting of ban on arrivals from South Asia.
 - Meanwhile, a decline was observed in the gross value added of the fisheries sector in Q3-2021 compared to the same quarter of 2020.

Annual GDP Growth Forecast

- Real GDP is estimated to have declined severely by 33.5% in 2020, according to the annual GDP estimates published by the Maldives Bureau of Statistics in 30th September 2021. This was underpinned by a sharp decline in tourism sector and other major sectors such as wholesale and retail trade, construction and real estate, as well as transport and communication. According to forecasts published in October 2021¹, real GDP is projected to grow in the range 28.1% and 38.5% in 2021, with the most likely growth rate as 31.6% for 2021. Going forward, real GDP is projected to grow by 12.0% in 2022.

Tourism

- In January 2022, both tourist arrivals and bednights increased significantly (by 43% and 33%, respectively) when compared with January 2021, however, tourist arrivals remains below pre-pandemic levels of January 2019. Total tourist arrivals stood at 131,764 in January 2022, which is a decline of 13% when compared with January 2019, although bednights registered an increase of 11% during the period.
 - The annual increase in tourist arrivals mainly reflected the surge in arrivals from the main source markets. During the month, the largest number of tourist arrivals were recorded from Russia, followed by the United Kingdom, India, Italy and Germany.
- The operational bed capacity of the tourism industry observed an increase of 10,130 beds when compared with January 2021 (10,966 increase in December 2021), while the occupancy rate rose to 66% in January 2022 (71% in December 2021), from 61% in January 2021.
- Overall, for the year 2021, total tourist arrivals increased by 138% in annual terms (-67% in 2020) while total bednights of the industry observed an increase of 149% (-63% in 2020). However, both tourist arrivals and bednights remains below pre-pandemic levels of 2019 (decline of 22% and 7%, respectively). During this period, the average stay decreased to 8.8 days, from 18.5 days in the corresponding month of 2020.

Inflation

- The rate of inflation, as measured by the annual percentage change in the national CPI, edged up to 0.17% in January 2022, from 0.02% in December 2021.
 - From the major categories of the CPI, the largest contributors to the annual rate of inflation during December 2021 were medicines (0.20 percentage points); petrol for personal transport equipment (0.19 percentage points); fish (0.19 percentage points); restaurants and cafés (0.15 percentage points); narcotics (0.11 percentage points); housing rent (0.10 percentage points); mobile communication services (-1.10 percentage points) and passenger transport by air (-0.15 percentage points).
- The monthly percentage change in the national CPI rose to 0.40% in January 2022, from -0.07% in December 2021.
 - The largest contribution to the monthly rate of inflation came from medicines (0.20 percentage points); restaurants and cafés (0.08 percentage points); domestic and household services (0.06 percentage points); passenger transport by air (-0.15 percentage points); mobile communication services (-0.06 percentage points) and fruits (-0.04 percentage points).

Public Finance

- According to the latest available data, total revenue (excluding grants) observed an increase of MVR1.0 billion (or 119%) in November 2021 when compared with November 2020, mainly driven by a growth in non-tax revenue, followed by a growth in tax revenue. As such, non-tax revenue rose by MVR660.4 million, while tax revenue increased by MVR347.8 million.
- Total expenditure (excluding amortisation) rose by MVR743.1 million (or 33%) in November 2021 when compared with November 2020, mainly due to an increase in capital expenditure, which posted an increment of MVR494.6 million, while recurrent expenditure increased by MVR248.5 million.
- According to the latest available data, the stock of total government debt (excluding government guaranteed debt) amounted to MVR77.4 billion at the end of Q3-2021, an 8% increase from Q2-2021. Similarly, total government debt as a percentage of GDP increased to 101% at the end of Q3-2021 from 93% in Q2-2021.
 - During this period, the increase in government debt was primarily driven by external debt.

Monetary Developments

Reserve Money

- Annual reserve money (M0) growth accelerated to 3% at the end of January 2022, after recording 1% at the end of December 2021. The increase in reserve money growth stemmed from an increase in net foreign assets of the MMA, despite a fall in net domestic assets.
 - Net foreign assets increased mainly due to the significant decline in foreign liabilities, largely reflecting the base effect of the repayment of the swap with the Reserve Bank of India (RBI), despite the decline in foreign asset accumulation. Meanwhile, net domestic assets declined mainly due to the increase in overnight deposit facility (ODF) placements by the commercial banks, followed by the fall in claims on commercial banks.

Broad Money

- Annual broad money (M2) growth stood at 27% at the end of January 2022, broadly unchanged from the growth registered during December 2021.
 - On the components side, the annual growth in broad money was primarily driven by an increase in quasi money, mainly owing to a substantial growth in transferable deposits denominated in foreign currency and time deposits denominated in local currency, followed by a rise in savings deposits denominated in both local and foreign currency. Meanwhile, narrow money also observed a notable increase, owing to a substantial increase in transferable deposits.
 - As for the sources, the annual broad money growth was mainly driven by the significant rise in net foreign assets, mainly owing to the increase in foreign assets of the banking system, together with the decline in foreign liabilities of the banking system. Similarly, net domestic assets also increased, due to the rise in net claims on the central government by the commercial banks, while the growth in credit to private sector also contributed notably.

Credit to Private Sector

- The annual growth rate of credit to the private sector by the commercial banks remained unchanged at 5% at the end of January 2022. Meanwhile, on monthly terms, credit to the private sector registered -0.2% at the end of January 2022 (-0.8% in December 2021).
 - With regard to the composition of credit to the private sector, annual growth rates were observed for all the major sectors, namely, tourism, transport and communication, commerce and, construction, except for real estate sector. Likewise, credit extended as personal loans observed a significant increase over the period.
 - Credit extended to the tourism sector registered an annual growth of 4% during January 2022, mainly driven by a marked growth in credit lent in the form of working capital, despite the decline in credit lent for new resort development and renovation of resorts.

External Trade

- Total exports (f.o.b) increased significantly by 72% in January 2022 when compared with January 2021, while total imports (c.i.f) increased by 49% in January 2022 when compared with January 2021. In monthly terms, total exports increased by 40% in January 2022, while total imports declined by 8%.
 - The annual increase in total exports stemmed from the growth in re-exports as well as domestic exports. The increase in re-exports was primarily due to re-exports of jet fuel. Meanwhile, the increase in domestic exports was mainly due to the increase in export earnings from frozen skipjack tuna. In addition, a growth was observed in export earnings from canned or pouched tuna, fresh or chilled yellowfin tuna and frozen yellowfin tuna.
 - As for the annual increase in total imports, the most significant increases were observed in the imports of construction-related items and petroleum products. Further, increases were observed in import of machinery and mechanical appliances and parts, food items, transport, equipment and parts and electrical and electronic machinery and equipments and parts.
- Overall, during the year 2021, total exports remained broadly unchanged when compared with 2020, while total imports increased by 40% when compared with 2020.

Gross International Reserves

- Gross international reserves² (official (official reserve assets) declined to US\$753.4 million at the end of January 2022, from US\$791.2 million at the end of December 2021. Similarly, this was a decrease from the US\$830.7 million recorded at the end of January 2021.
 - In terms of growth rates, gross international reserves recorded a 5% decline when compared with December 2021, while a decline of 9% was registered when compared with January 2021, reflecting the base effect of the repayment of RBI swap.
